

Total Special Education System (TSES) Twin Lakes STEM Academy

This plan was reviewed and updated in accordance with the annual requirement under Minn. Stat. § 125A.0942. No legislative changes required revisions for FY27.. It is publicly posted on the school's website and available in alternative formats upon request.

This document serves as the Total Special Education System Plan for Twin Lakes STEM Academy in accordance with Minnesota Rule 3525.1100. This plan also includes an assurance for compliance with the federal requirements pertaining to districts' special education responsibilities found in United States Code, title 20, chapter 33, sections 1400 et seq., and Code of Federal Regulations, title 34, part 300. This document is a companion to the Application for Special Education Funds – Statement of Assurances (ED-01350-29).

Tammy Stahl, special education director, is responsible for program development, coordination, and evaluation; in-service training; and general special education supervision and administration. Tammy Stahl may be reached at tammy@edsources.net or by phone at 507-690-2838.

I. Child Study Procedures

The district's identification system is developed according to the requirement of nondiscrimination as Twin Lakes STEM Academy does not discriminate in education on the basis of race, color, creed, religion, national origin, sex, age, marital status, status with regard to public assistance, sexual orientation, or disability.

A. Identification

Twin Lakes STEM Academy is a charter school and is responsible for identifying students in grades kindergarten through eighth grade who may need special education services and who attend the charter school. Twin Lakes STEM Academy does not provide services for students under Part C.

Twin Lakes STEM Academy has a Multi-Tiered Systems of Support (MTSS) team. The purpose of this team is to provide support for classroom teachers on a regular basis. The MTSS team is comprised of general education teachers, special education teachers, building leaders, and school support staff. The group works collaboratively to identify the needs of learners, provide strategies and interventions, and develop a timeline and evaluate the determined course of action.

If a student is experiencing difficulty in academics, behavior, or social-emotional functioning, as evidenced by universal screening, work samples, observations, staff reports, or other relevant information, the student's general education teacher will complete a pre-referral form and share relevant information with the MTSS team. The MTSS team meets monthly and assists classroom teachers with appropriate evidence-based interventions, accommodations, modifications, and other supports. Before a student is referred for a special education evaluation, Twin Lakes STEM Academy will conduct and document at least two instructional strategies, alternatives, or interventions using a system of scientific, research-based instruction and intervention in academics or behavior, based on the student's needs, while the student is in the regular classroom, consistent with Minnesota Statutes, section 125A.56. The student's teacher will document the results of the interventions. The intervention requirement may be waived by the special education evaluation team when it determines that the student's need for evaluation is urgent. The intervention requirement will not be used to deny or delay a student's right to a special education evaluation. Interventions will be implemented for a sufficient period to determine their effectiveness based on the student's individual needs and the nature of the intervention. A fixed minimum duration of 30 school days or six weeks will not be required for every intervention. When a referral for a special education evaluation is received, the Child Study Team will review the available information and determine the appropriate next steps in accordance with Minnesota and federal special education requirements. If an evaluation is warranted, an evaluation team will be formed and the parent/guardian will be invited to participate in planning the evaluation.

In the event that the prereferral intervention is not successful, the MTSS team may refer the learner to the Child Study Team (CST) for a possible Special Education evaluation. The CST is comprised of special education teachers, speech/language pathologists, school psychologists, and other related service personnel. This team will evaluate the prereferral information, pertinent student information, and address areas of concern before deciding to recommend evaluation. If an evaluation is recommended, a team is formed, and parents are asked to attend a meeting at school to assist in planning the evaluation.

This process and the parent/guardian referral form is attached as Appendix B.

The following italicized information is required by the Minnesota Department of Education to appear in this document; however, it **does not** apply to Twin Lakes STEM Academy Charter School.

Infant and toddler intervention services under United States Code, title 20, chapter 33, section 1431 et seq., and Code of Federal Regulations, title 34, part 303, are available in Twin Lakes STEM Academy to children from birth through two years of age who meet the outlined criteria.

The team determines that a child from birth through the age of two years is eligible for infant and toddler intervention services if:

A. the child meets the criteria of one of the disability categories in United States Code, title 20, chapter 33, sections 1400, et. seq., as defined in Minnesota Rules; or

B. the child meets one of the criteria for developmental delay in subitem (1) or the criteria in subitem (2);

(1) the child has a diagnosed physical or mental condition or disorder that has a high probability of resulting in developmental delay regardless of whether the child has a demonstrated need or delay; or

(2) the child is experiencing a developmental delay that is demonstrated by a score of 1.5 standard deviations or more below the mean, as measured by the appropriate diagnostic measures and procedures, in one or more of the following areas:

(a) cognitive development;

(b) physical development, including vision and hearing;

(c) communication development;

(d) social or emotional development; and

(e) adaptive development.

(3) The child's eligibility is established through the application of informed clinical opinion. Informed clinical opinion may be used as an independent basis to establish a child's eligibility under this part even when other instruments do not establish eligibility; however, in no event may informed clinical opinion be used to negate the results of evaluation instruments to establish eligibility.

Twin Lakes STEM Academy serves students in grades KG-7. The italicized section below is required by MDE to be in this document but **does not** apply to Twin Lakes STEM Academy.

The team shall determine that a child from the age of three years through the age of six years is eligible for special education when:

A. the child meets the criteria of one of the categorical disabilities in United States Code, title 20, chapter 33, sections 1400 et seq., as defined in Minnesota Rules; or

B. *the child meets one of the criteria for developmental delay in subitem (1) and the criteria in subitem (2). Twin Lakes STEM Academy [as elected the option of implementing these criteria for developmental delay.*

If your district provides education for this age group, indicate whether your district has elected to implement these criteria for developmental delay. If your district chooses to implement these criteria, it may not modify them.

[Include the information below only if your district chooses the option of implementing these criteria for developmental delay.]

(1) The child:

(a) has a diagnosed physical or mental condition or disorder that has a high probability or resulting in developmental delay; or

(b) has a delay in each of two or more of the areas of cognitive development; physical development, including vision and hearing; communication development; social or emotional development; and adaptive development, that is verified by an evaluation using one or more

technically adequate, norm-referenced instruments. The instruments must be individually administered by appropriately trained professionals and the scores must be at least 1.5 standard deviations below the mean in each area.

(2) The child's need for special education is supported by:

(a) at least one documented, systematic observation in the child's routine setting by an appropriate professional or; if observation in the daily routine setting is not possible, the alternative setting must be justified;

(b) a developmental history; and

(c) at least one other evaluation procedure in each area of identified delay that is conducted on a different day than the medical or norm-referenced evaluation; which may include criterion references instruments, language samples, or curriculum-based measures.

Evaluation

Twin Lakes STEM Academy's plan for identifying a child with a specific learning disability is consistent with Minnesota Rule 3525.1341. Twin Lakes STEM Academy implements its interventions consistent with that plan. Twin Lakes STEM Academy does not use a response-to-scientific-research-based-intervention (SRBI) process as its selected method for determining specific learning disability eligibility under Criterion D. Twin Lakes STEM Academy has elected to use Criteria A, B, and C for specific learning disability identification, as described in Appendix A. The school may use evidence-based interventions and progress-monitoring data as part of its general education problem-solving and evaluation processes.

Evaluation of the child and assessment of the child and family will be conducted in a manner consistent with Code of Federal Regulations, title 34, section 303.321.

The following italicized section is required by the Minnesota Department of Education but **does not** apply to Twin Lakes STEM Academy.

A. General. (1) The lead agency must ensure that, subject to obtaining parental consent in accordance with §303.420(a)(2), each child under the age of three who is referred for evaluation or early intervention services under this part and suspected of having a disability, receives—

(i) A timely, comprehensive, multidisciplinary evaluation of the child in accordance with paragraph (b) of this section unless eligibility is established under paragraph (a)(3)(i) of this section; and

(ii) If the child is determined eligible as an infant or toddler with a disability as defined in §303.21;

(A) A multidisciplinary assessment of the unique strengths and needs of that infant or toddler and the identification of services appropriate to meet those needs;

(B) A family-directed assessment of the resources, priorities, and concerns of the family and the identification of the supports and services necessary to enhance the family's capacity to meet the developmental needs of that infant or toddler. The assessments of the child and family are described in paragraph (c) of this section and these assessments may occur simultaneously with the evaluation, provided that the requirements of paragraph (b) of this section are met.

(2) As used in this part—

(i) *Evaluation means the procedures used by qualified personnel to determine a child's initial and continuing eligibility under this part, consistent with the definition of infant or toddler with a disability in §303.21. An initial evaluation refers to the child's evaluation to determine his or her initial eligibility under this part;*

(ii) *Assessment means the ongoing procedures used by qualified personnel to identify the child's unique strengths and needs and the early intervention services appropriate to meet those needs throughout the period of the child's eligibility under this part and includes the assessment of the child, consistent with paragraph (c)(1) of this section and the assessment of the child's family, consistent with paragraph (c)(2) of this section; and*

(iii) *Initial assessment refers to the assessment of the child and the family assessment conducted prior to the child's first IFSP meeting.*

(3)(i) *A child's medical and other records may be used to establish eligibility (without conducting an evaluation of the child) under this part if those records indicate that the child's level of functioning in one or more of the developmental areas identified in §303.21(a)(1) constitutes a developmental delay or that the child otherwise meets the criteria for an infant or toddler with a disability under §303.21. If the child's part C eligibility is established under this paragraph, the lead agency or EIS provider must conduct assessments of the child and family in accordance with paragraph (c) of this section.*

(ii) *Qualified personnel must use informed clinical opinion when conducting an evaluation and assessment of the child. In addition, the lead agency must ensure that informed clinical opinion may be used as an independent basis to establish a child's eligibility under this part even when other instruments do not establish eligibility; however, in no event may informed clinical opinion be used to negate the results of evaluation instruments used to establish eligibility under paragraph (b) of this section.*

(4) *All evaluations and assessments of the child and family must be conducted by qualified personnel, in a nondiscriminatory manner, and selected and administered so as not to be racially or culturally discriminatory.*

(5) *Unless clearly not feasible to do so, all evaluations and assessments of a child must be conducted in the native language of the child, in accordance with the definition of native language in §303.25.*

(6) *Unless clearly not feasible to do so, family assessments must be conducted in the native*

language of the family members being assessed, in accordance with the definition of native language in §303.25.

B. Procedures for evaluation of the child. In conducting an evaluation, no single procedure may be used as the sole criterion for determining a child's eligibility under this part. Procedures must include –

- (1) Administering an evaluation instrument;*
- (2) Taking the child's history (including interviewing the parent);*
- (3) Identifying the child's level of functioning in each of the developmental areas in § 303.21(a)(1);*
- (4) Gathering information from other sources such as family members, other care- givers, medical providers, social workers, and educators, if necessary, to understand the full scope of the child's unique strengths and needs; and*
- (5) Reviewing medical, educational, or other records.*

C. Procedures for assessment of the child and family.

(1) An assessment of each infant or toddler with a disability must be conducted by qualified personnel in order to identify the child's unique strengths and needs and the early intervention services appropriate to meet those needs. The assessment of the child must include the following:

- (i) A review of the results of the evaluation conducted by paragraph (b) of this section;*
- (ii) Personal observations of the child; and*
- (iii) The identification of the child's needs in each of the developmental areas in § 303.21(a)(1).*

(2) A family-directed assessment must be conducted by qualified personnel in order to identify the family's resources, priorities, and concerns and the supports and services necessary to enhance the family's capacity to meet the developmental needs of the family's infant or toddler with a disability. The family-directed assessment must –

- (i) Be voluntary on the part of each family member participating in the assessment;*
- (ii) Be based on information obtained through an assessment tool and also through an interview with those family members who elect to participate in the assessment; and*

- (iii) *Include the family's description of its resources, priorities, and concerns related to enhancing the child's development.*

For the grade levels served, the team conducts an evaluation for special education purposes within a reasonable time not to exceed 30 school days from the date the district receives parental permission to conduct the evaluation or the expiration of the 14-calendar day parental response time in cases other than initial evaluation, unless a conciliation conference or hearing is requested.

Twin Lakes STEM Academy conducts full and individual initial evaluation before the initial provision of special education and related services to a pupil. The initial evaluation shall consist of procedures to determine whether a child is a pupil with a disability that adversely affects the child's educational performance as defined in Minnesota Statutes, section 125A.02, who by reason thereof needs special education and related services, and to determine the educational needs of the pupil. The district proposes to conduct an initial evaluation to determine if the child qualifies as a pupil with a disability shall obtain an informed consent from the parent of the child before the evaluation is conducted. Parental consent for evaluation shall not be construed as consent for placement for receipt of special education and related services. The District will not override the written refusal of a parent to consent to an initial evaluation or re-evaluation.

Evaluation Procedures

Evaluations and reevaluations are conducted according to the following procedures:

- A. Twin Lakes STEM Academy provides notice to the parents of the pupil, according to Code of Federal Regulations, title 34, sections 300.500 to 300.505, that describes any evaluation procedures the district proposes to conduct.
- B. In conducting the evaluation, Twin Lakes STEM Academy:
 - (1) uses a variety of evaluation tools and strategies to gather relevant functional and developmental information, including information provided by the parent, that are designed to assist in determining whether the child is a pupil with a disability and the content of the pupil's individualized education program, including information related to enabling the pupil to be involved in and progress in the general curriculum, or for preschool pupils, to participate in appropriate activities;
 - (2) does not use any single procedure as the sole criterion for determining whether a child is a pupil with a disability or determining an appropriate education program for the pupil; and
 - (3) uses technically sound instruments that are designed to assess the relative contribution of cognitive and behavioral factors, in addition to physical or developmental factors.

C. Twin Lakes STEM Academy ensures that:

- (1) tests and other evaluation materials used to evaluate a child under this part are selected and administered so as not be discriminatory on a racial or cultural basis, and are provided and administered in the pupil's native language or other mode of communication, unless it is clearly not feasible to do so;
- (2) materials and procedures used to evaluate a child with limited English proficiency are selected and administered to ensure that they measure the extent to which the child has a disability and needs special education and related services, rather than measure the child's English language skills;
- (3) any standardized tests that are given to the child have been validated for the specific purpose for which they are used, are administered by trained and knowledgeable personnel, and are administered in accordance with any instructions provided by the producer of such tests;
- (4) the child is evaluated in all areas of suspected disability, including, if appropriate, health, vision, hearing, social and emotional status, general intelligence, academic performance, communicative status, and motor abilities;
- (5) evaluation tools and strategies that provide relevant information that directly assists persons in determining the educational needs of the pupil are provided;
- (6) if an evaluation is not conducted under standard conditions, a description of the extent to which it varied from standard conditions must be included in the evaluation report;
- (7) tests and other evaluation materials include those tailored to evaluate specific areas of educational need and not merely those that are designed to provide a single general intelligence quotient;
- (8) tests are selected and administered so as best to ensure that if a test is administered to a child with impaired sensory, manual, or speaking skills, the test results accurately reflect the child's aptitude or achievement level or whatever other factors the test purports to measure, rather than reflecting the child's impaired sensory, manual, or speaking skills, unless those skills are the factors that the test purports to measure; and
- (9) in evaluating each pupil with a disability, the evaluation is sufficiently comprehensive to identify all of the pupil's special education and related service needs, whether or not commonly linked to the disability category in which the pupil has been classified.

D. Upon completion of administration of tests and other evaluation materials, the determination

of whether the child is a pupil with a disability as defined in Minnesota Statutes, section 125A.02, shall be made by a team of qualified professionals and the parent of the pupil in accordance with item E, and a copy of the evaluation report and the documentation of determination of eligibility will be given to the parent.

E. In deciding eligibility under item D, a child shall not be determined to be a pupil with a disability if the determinant factor for such determination is lack of instruction in reading or math or limited English proficiency, and the child does not otherwise meet eligibility criteria under parts 3525.1325 to 3525.1351.

Additional requirements for evaluations and reevaluations

A. As part of an initial evaluation, if appropriate, and as part of any reevaluation under this part, or a reinstatement under part 3525.3100, the IEP team and other qualified professionals, as appropriate, shall:

(1) review existing evaluation data on the pupil, including evaluations and information provided by the parents of the pupil, current classroom-based assessments and observations, and teacher and related services providers observation; and

(2) on the basis of the review, and input from the pupil's parents, identify what additional data, if any, are needed to determine whether the pupil has a particular category of disability, as described in Minnesota Statutes, section 125A.02, or, in case of a reevaluation of a pupil, whether the pupil continues to have such a disability, the present levels of performance and educational needs of the pupil, whether the pupil needs special education and related services, or in the case of a reevaluation of a pupil, whether the pupil continues to need special education and related services, and whether any additions or modifications to the special education and related services are needed to enable the pupil to meet the measurable annual goals set out in the individualized education program of the pupil and to participate, as appropriate, in the general curriculum.

B. The district administers such tests and other evaluation materials as may be needed to produce the data identified by the IEP team under item A, subitem (2).

C. The district obtains informed parental consent, in accordance with subpart 1, prior to conducting any reevaluation of a pupil, except that such informed parental consent need not be obtained if the district can demonstrate that it had taken reasonable measures to obtain such consent

and the pupil's parent has failed to respond.

D. If the IEP team and other qualified professionals, as appropriate, determine that no additional data are needed to determine whether the pupil continues to be a pupil with a disability, the district shall notify the pupil's parents of that determination and the reasons for it, and the right of such parents to request an evaluation to determine whether the pupil continues to be a pupil with a disability, and shall not be required to conduct such an evaluation unless requested to by the pupil's parents.

E. The district evaluates a pupil in accordance with this part before determining that the pupil is no longer a pupil with a disability.

X The district intends to use restrictive procedures. See the attached Restrictive Procedure Plan. The district follows the restrictive procedure statute, Minnesota Statutes, sections 125A.0941 and 125A.0942.

 The district **does not** intend to use restrictive procedures.

Procedures for determining eligibility and placement

- A. In interpreting the evaluation data for the purpose of determining if a child is a pupil with a disability under parts 3525.1325 to 3525.1351 and the educational needs of the child, the school district:
- (1) draws upon information from a variety of sources, including aptitude and achievement tests, parent input, teacher recommendations, physical condition, social or cultural background, and adaptive behavior; and
 - (2) ensures that the information obtained from all the sources is documented and carefully considered.
- B. If a determination is made that a child is a pupil with a disability who needs special education and related services, an IEP must be developed for the pupil according to part 3525.2810.

Evaluation report

An evaluation report must be completed and delivered to the pupil's parents within the specified evaluation timeline. At a minimum, the evaluation report must include:

- A. a summary of all evaluation results;
- B. documentation of whether the pupil has a particular category of disability or, in the case of a reevaluation, whether the pupil continues to have such a disability;
- C. the pupil's present levels of performance and educational needs that derive from the disability;
- D. whether the child needs special education and related services or, in the case of a reevaluation, whether the pupil continues to need special education and related services; and
- E. whether any additions or modifications to the special education and related services are needed to enable the pupil to meet the measurable annual goals set out in the pupil's IEP and to participate, as appropriate, in the general curriculum.

C. Plan for Receiving Referrals

Twin Lakes STEM Academy's plan for receiving referrals from parents, physicians, private and public programs, and health and human services agencies is attached as Appendix B.

II. Method of Providing the Special Education Services for the Identified Pupils

Twin Lakes STEM Academy provides a full range of educational service alternatives. All students with disabilities are provided the special instruction and services appropriate to their needs. The following is representative of Twin Lakes STEM Academy's method of providing the special education services for the identified pupils, sites available at which service may occur, and instruction and related services are available.

Appropriate program alternatives to meet the special education needs, goals, and objectives of a pupil are determined on an individual basis. Choice of specific program alternatives are based on the pupil's current levels of performance, pupil special education needs, goals, and objectives, and must be written in the IEP. Program alternatives are comprised of the type of services provided, the setting in which services occur, and the amount of time and frequency in which special education services occur. A pupil may receive special education services in more than one alternative based on the IEP.

A. Method of providing the special education services for the identified pupils:

- (1) one on one services
- (2) small group
- (3) direct
- (4) in-direct,
- (5) co-teaching

B. Alternative sites available at which services may occur:

- (1) Homebound or home-based services (location of services TBD by school or IEP team)
- (2) Other resident districts (location of services determined by district rep)

C. Available instruction and related services:

- (1) School Psychology
- (2) Occupational Therapy
- (3) Speech and Language
- (4) Adapted Physical Education
- (5) Deaf/Hard of Hearing and Audiological services

(6) Other services required by the IEP

The specific method, setting, frequency, duration, and amount of special education services are determined by the IEP team based on the pupil's individual needs and least restrictive environment requirements. A pupil may receive services through more than one service-delivery method based on the IEP.

III. Administration and Management Plan

Twin Lakes STEM Academy utilizes the following administration and management plan to assure effective and efficient results of child study procedures and method of providing special education services for the identified pupils:

A. The following table illustrates the organization of administration and management to assure effective and efficient results of child study procedures and method of providing special education services for the identified pupils:

Staff Name and Title	Contact Information (phone/email/ mailing address/office location)	Brief Description of Staff Responsibilities relating to child study procedures and method of providing special education services
Jason R Stockwell Director of Twin Lakes STEM Academy	6201 Noble Avenue North Brooklyn Center, MN 55429 763-338-9373 jason.stockwell@twinlakesacademy.org	Provides broad oversight of school programming; Provides supervision and guidance to all staff; Recruits, hires, and evaluates staff; Represents the school at Board Meetings.
Tammy Stahl Special Education Director <i>Contracted</i>	507-215-3172 tammy@edsource.net	As the Director of Special Education, Tammy Stahl provides oversight of all special education programming within the building.

Jennifer Reeck Special Education Coordinator	6201 Noble Avenue North Brooklyn Center, MN 55429 763-338-9373 jennifer.reeck@twinlakesacademy.org	As the Coordinator of Special Education, Jennifer provides onsite support for day-to-day special education operations, assisting the Special Education Director with program development and implementation. Ensures compliance with regulations, collaborates with general education staff, and supports effective communication among staff and families. Oversees documentation, coordinates professional development, and continuously assesses services to meet the needs of students with disabilities.
--	--	---

B. Due Process assurances available to parents: Twin Lakes STEM Academy has appropriate and proper due process procedures in place to assure effective and efficient results of child study procedures and methods of providing special education services for the identified pupils, including alternative dispute resolution and due process hearings. A description of these processes are as follows:

(1) Prior written notice to a) inform the parent that except for the initial placement of a child in special education, the school district will proceed with its proposal for the child's placement or for providing special education services unless the child's parent notifies the district of an objection within 14 days of when the district sends the prior written notice to the parent; and b) state that a parent who objects to a proposal or refusal in the prior written notice may request a conciliation conference or another alternative dispute resolution procedure.

(2) Twin Lakes STEM Academy will not proceed with the initial evaluation of a child, the initial placement of a child in a special education program, or the initial provision of special education services for a child without the prior written consent of the child's parent.

A district may not override the written refusal of a parent to consent to an initial evaluation or reevaluation.

(3) A parent, after consulting with health care, education, or other professional providers,

may agree or disagree to provide the parent's child with sympathomimetic medications unless medical, dental, mental and other health services are necessary, in the professional's judgment, that the risk

to the minor's life or health is of such a nature that treatment should be given without delay and the requirement of consent would result in delay or denial of treatment.

(4) Parties are encouraged to resolve disputes over the identification, evaluation, educational placement, manifestation determination, interim alternative educational placement, or the provision of a free appropriate public education to a child with a disability through conciliation, mediation, facilitated team meetings, or other alternative process. All dispute resolution options are voluntary on the part of the parent and must not be used to deny or delay the right to a due process hearing. All dispute resolution processes are provided at no cost to the parent.

(5) Conciliation Conference: a parent has the opportunity to meet with appropriate district staff in at least one conciliation conference if the parent objects to any proposal of which the parent receives prior written notice. Twin Lakes STEM Academy holds a conciliation conference within ten calendar days from the date the district receives a parent's objection to a proposal or refusal in the prior written notice. All discussions held during a conciliation conference are confidential and are not admissible in a due process hearing. Within five school days after the final conciliation conference, the district must prepare and provide to the parent a conciliation conference memorandum that describes the district's final proposed offer of service. This memorandum is admissible in evidence in any subsequent proceeding.

(6) In addition to offering at least one conciliation conference, Twin Lakes STEM Academy informs parents of other dispute resolution processes, including at least mediation and facilitated team meetings. The fact that an alternative dispute resolution process was used is admissible in evidence at any subsequent proceeding. State-provided mediators and team meeting facilitators shall not be subpoenaed to testify at a due process hearing or civil action under special education law nor are any records of mediators or state- provided team meeting facilitators accessible to the parties.

(7) Descriptions of the mediation process, facilitated team meetings, state complaint, and impartial due process hearings may be found in Twin Lakes STEM Academy's Procedure Safeguard Notice, attached as Appendix C.

IV. Interagency Agreements the District has Entered

Twin Lakes STEM Academy is a charter school serving students in kindergarten through seventh grade. Twin Lakes STEM Academy participates in interagency coordination and collaboration as appropriate to meet the needs of students with disabilities. Twin Lakes STEM Academy does not currently have formal interagency or joint-powers agreements related to special education. If the school enters into an

interagency or joint-powers agreement related to special education services, the TSES will be updated to identify the participating agencies, the purpose and terms of the agreement, and the agreement's termination or renewal date. As such, the following italicized section **does not** apply to the district but must remain in this TSES according to the Minnesota Department of Education.

District has entered in the following interagency agreements or joint powers board agreements for eligible

children, ages 3 to 21, to establish agency responsibility that assures that coordinated interagency services are coordinated, provided, and paid for, and that payment is facilitated from public and private sources:

<i>Name of Agency</i>	<i>Terms of Agreement</i>	<i>Agreement Termination/ Renewal Date</i>	<i>Comments</i>
No interagency agreements			

V. Special Education Advisory Council

In order to increase the involvement of parents of children with disabilities in district policy making and decision making, Twin Lakes STEM Academy has a special education advisory council.

A. Twin Lakes STEM Academy's Special Education Advisory Council is individually established.

B. Twin Lakes STEM Academy's Special Education Advisory Council is a subgroup of the Twin Lakes STEM Academy Board and advises on the needs of students with disabilities. The goal of the SEAC is to increase parent/guardian involvement in district policy making involving students with disabilities. Meetings provide a forum for parents to address special education concerns and dialogue about education strategies and student successes. The committee is open to all parents, including those with or without children enrolled with special education services.

C. Twin Lakes STEM Academy's Special Education Advisory Council consists of the following individuals:

- a. The Director of Special Education
- b. A licensed special education instructor
- c. Parents/Guardians, at least 50% being those of a child with a disability

D. Twin Lakes STEM Academy's Special Education Advisory Council meets once annually and

will be announced via email and oral communication to parents.

E. The operational procedures of Twin Lakes STEM Academy's Special Education Advisory Council are attached as *Appendix D*.

VI. Assurances

Code of Federal Regulations, section 300.201: Consistency with State policies. Twin Lakes STEM Academy, in providing for the education of children with disabilities within its jurisdiction, has in effect policies, procedures, and programs that are consistent with the State policies and procedures established under sections 300.101 through 300.163, and sections 300.165 through 300.174. (Authority: 20 U.S.C. § 1413(a)(1)).

Yes: Assurance is given by Twin Lakes STEM Academy.

Restrictive Procedures

Twin Lakes STEM Academy uses restrictive procedures only in response to behavior that constitutes an emergency, consistent with Minnesota Statutes, sections 125A.0941 and 125A.0942. Restrictive procedures are not used as punishment or discipline. A full copy of the Restrictive Procedures Plan is reviewed annually, publicly posted on the school's website, and available in alternative formats upon request.

Appendix A

Specific Learning Disabilities Criteria

In accordance with Minnesota Rule 3525.1341 Twin Lakes STEM Academy has elected to use Criteria A, B, and C of the Specific Learning Disabilities criteria and at this time has elected not to use Criteria D.

Specific Learning Disability Criteria for Special Education

Student Name: _____DOB: _____

Building: _____Reviewer Name: _____

Date of Evaluation Report: _____Eligible: ____Yes ____No

____Evaluation⇒ (Must meet initial criteria)

____Reevaluation⇒ (Must address criteria components)

Information about each item must be sought from the parent and included as part of the evaluation data. The evaluation data must confirm that the disabling effects of the child's disability occur in a variety of settings. The child must receive two interventions prior to evaluation unless the parent requests an evaluation or the team waives the requirement due to urgency. Based on information in the Evaluation Report and the student file, a pupil has a specific learning disability and is in need of special education and related services when the pupil meets the criteria in A, B, and C OR A, B, and D below.

A.Documentation of Inadequate Achievement

The child does not achieve adequately in one or more of the following areas in response to appropriate classroom instruction:

____Oral Expression

____Listening Comprehension

____Written Expression

____Basic Reading Skills

____Reading Comprehension

____Reading Fluency

____Mathematics Calculation

____Mathematical Problem Solving

AND

__The child does not make adequate progress to meet age or state-approved grade-level standards in one or more of the areas listed above when using a process based on the child's response to scientific, research-based intervention;

OR

__The child exhibits a pattern of strengths and weaknesses in performance, achievement, or both, relative to age, state-approved grade-level standards, or intellectual development, that is determined by the group to be relevant to the identification of a specific learning disability (SLD). Specific Learning Disability

AND

_____Documentation to support this finding must be both representative of the pupil's curriculum and useful for developing instructional goals and objectives. Documentation includes evidence of low achievement from the following sources, when available:

_____Cumulative record reviews

_____Class work samples

_____Anecdotal teacher records

_____Statewide and district-wide assessments

_____Formal, diagnostic, and informal tests

_____Results from targeted support programs in general education

_____Curriculum based evaluation results

B. Information Processing

The child has a disorder in one or more of the basic psychological processes, which includes an information processing condition that is manifested in a variety of setting by behaviors such as inadequate:

__Acquisition of information

_____Organization

_____Planning and sequencing

_____Working memory, including verbal, visual, or spatial

_____Visual and auditory processing

____Speed of processing
____Verbal and nonverbal expression
____Transfer of information
____Motor control for written tasks (pencil and paper assignments, drawing, and copying)
____Other: _____

C. Severe Discrepancy The child demonstrates a severe discrepancy between general intellectual ability and achievement in at least one of the identified areas of achievement. The demonstration of a severe discrepancy shall not be based solely on the use of standardized tests. The instruments used to assess the child's general Specific Learning Disability intellectual ability and achievement must be individually administered and interpreted by an appropriately licensed person using standardized procedures. For initial placement, the severe discrepancy must be equal to or greater than 1.75 standard deviations below the mean on a distribution of regression scores for the general population at the student's chronological age.

General Intellectual Ability Assessment Measure: _____

Overall Composite Score: _____Regression Score: _____

Achievement Measure: _____

Cluster Area Composite Score

Oral Expression _____
Listening Comprehension _____
Written Expression _____
Basic Reading Skills _____
Reading Fluency Skills _____
Reading Comprehension _____
Mathematical Calculation _____
Mathematical Problem Solving _____

D. Inadequate rate of progress in response to scientific research-based intervention (SRBI)

The child demonstrates an inadequate rate of progress in response to intensive SBRI and the following

components are documented:

_____Rate of progress is measured over at least 7 school weeks on a minimum of 12 data points;

_____Rate of improvement is minimal and continued intervention will not likely result in reaching age or state-approved grade-level standards;

_____Progress will likely not be maintained when instructional supports are removed;

_____Level of performance in repeated assessment of achievement falls below the child's age or state- approved grade-level standards; and

_____Level of achievement is at or below the 5th percentile on one or more valid and reliable achievement tests using either state or national comparisons. Local comparison data that is valid and reliable may be used in addition to either state or national data, but if it differs from either state or national data, the group must provide a rationale to explain the difference.

Appendix B

Pre- Referral and Referral Process for Special Education

Twin Lakes STEM Academy

Twin Lakes STEM Academy is a charter school and as such is responsible for identifying students in grades KG-7 needing special education services who attend the charter school. Twin Lakes STEM Academy does not provide services for students under the category of Part C.

Twin Lakes STEM Academy has a Multi-Tiered Support Systems (MTSS) team. The purpose of this team is to provide support for classroom teachers on a regular basis. The MTSS team is comprised of general education teachers, special education teachers, building leaders, and school support staff. The group works collaboratively to identify needs of learners, provide strategies and interventions, and develop a timeline and evaluate the determined course of action.

If a student is experiencing difficulty in academics, behavior, or social-emotional functioning, the general education teacher will complete a pre-referral form and share relevant information with the MTSS team. The MTSS team will review available data and assist the classroom teacher in identifying appropriate evidence-based interventions, accommodations, modifications, and other supports. Before a student is referred for a special education evaluation, Twin Lakes STEM Academy will conduct and document at least two instructional strategies, alternatives, or interventions using a system of scientific, research-based instruction and intervention in academics or behavior, based on the student's needs, while the student is in the regular classroom, consistent with Minnesota Statutes, section 125A.56. The student's teacher will document the results. The requirement may be waived by the special education evaluation team when it determines that the student's need for evaluation is urgent. This requirement will not be used to deny or delay a student's right to a special education evaluation. Interventions will be implemented for a sufficient period to determine their effectiveness based on the student's individual needs and the nature of the intervention. A fixed minimum duration of 30 school days or six weeks will not be required for every intervention. When a referral for a special education evaluation is received, the Child Study Team will review the referral information and determine the appropriate next steps. If an evaluation is warranted, an evaluation team will be formed and the parent/guardian will be invited to participate in planning the evaluation.

In the event that the prereferral intervention is not successful, the MTSS team may refer the learner to the Child Study Team (CST) for a possible Special Education evaluation. The CST is comprised of special education teachers, speech/language pathologists, school psychologists, and other related service

personnel. This team will evaluate the prereferral information, pertinent student information, and address areas of concern before deciding to recommend evaluation. If an evaluation is recommended, a team is formed and parents are asked to attend a meeting at school to assist in planning the evaluation.

Special Education Parent Referral Form

This form must be completed and signed by a parent or legal guardian.

Completed forms can be returned to Tammy Stahl, Director of Special Education, at

tammy@edsources.net

Child's Name: _____

D.O.B _____ *Grade* _____

School: _____

Parent Name(s): _____

Phone Number: _____

Address:

Please indicate why you are referring your child for special education services. Please list specific concerns.

Please attach any prior school-based evaluation reports or private evaluation reports to help the school evaluation team better understand this referral background.

☐ *Check if prior evaluation reports are attached Thank you very much for your help!*

Parent's Signature: _____ *Date:* _____

Appendix D

Special Education Parent Advisory Council

1. All parents of students with disabilities are invited to participate in Twin Lakes STEM Academy's Special Education Advisory Council (SEAC).
 2. Meetings are held at least once per year.
 3. Meetings will be announced through email and oral communication to parents.
 4. At least 50% of SEAC members will be parents of students of disabilities.
-
1. Twin Lakes STEM Academy SEAC is an advisory committee to the Twin Lakes STEM Academy Board, advising on the needs of students with disabilities. The goal of the SEAC is to increase parent/guardian involvement in district policy making and decision-making involving students with disabilities. Meetings will provide a forum for parents to address special education concerns and dialogue about education strategies and student successes. The committee is open to all parents, including those without children enrolled with an IEP.
